NEEDS A DECISION

— surfaced at the top, even though the data looks “fine”

T-2014

Same trip ID, two different people.

Tim Krüger (London) was deleted in v2; the booking tool re-issued **T-2014** to Leon Roth (Hamburg) in v3. Confirm the re-use is intentional before sign-off.

T-2017 / T-2018

Mia Schulz, same dates (14–16 Aug), two cities (Zürich & Genf).

Notes say “separate trip” — flagged as a look-alike, **not** a duplicate. Also a third Mia Schulz on T-2007 — same person?

REMOVED · 1

T-2014

Tim Krüger · London · ADM · €870

Dropped during approval (v1 → v2)

ADDED · 2

T-2099

Ida Pohl · Brüssel · €575

Added last-minute in v3 — emergency

T-2014

Leon Roth · Hamburg · €410

Re-used a deleted trip ID — see “needs a decision”

IMPORTANT EDITS · 5

T-2009

Emma Schäfer · est. cost ~~4-500€~~ → **450€** (typo, v2)

T-2007

Mia Schulz · destination ~~Frankfurt~~ → **Köln** (v2)

T-2011→2911

Hannah Richter · **ID renamed** (system migration, v2)

~18 minor / expected changes

Actual costs filled in across all trips (est. vs. actual within €50) · T-2003 return date –1 day · name capitalisation.

11 trips unchanged

No meaningful change v1→v3. Hidden by default so the officer’s attention stays on the 8 that matter.

Reads as:

lands on a ranked digest with decisions at the top (1); clicking any trip opens the same v1→v3 history panel as Wireframe 1 (2); importance is the grouping, so real change vs. noise is the page structure itself (3); search, the v1→v3 comparison selector, and the €50 toggle refocus the list (4).
